

DBIT Journal of Science and Engineering (DBJSE 2017 edition)

The *DBIT Journal of Science and Engineering* is an open access multi-disciplinary journal which delivers information online to all professionals and expertise involved in basic and/or applied engineering research. It is publishing a range of peer-reviewed original or extended papers, including: Research papers, Reviews and Communications. It aims to attract and solicit original applied research papers in all aspects of science and engineering with special emphasis on the most current topics of interest to the associated research communities.

The journal stimulates the exchange and sharing of wide electronic dissemination of innovative and consequential research knowledge and best practice in the fields of Science and Engineering. The journal features the modelling and methodology developments including: Mechanics & Mechanical Engineering, Electronics & Communication, Computer Science, Educational Technologies, Industrial Engineering, Water, Energy, Biotechnology, Habitat & Environmental Studies, Agricultural Engineering and Technologies for Sustainable Developments. As the Journal is international in scope, papers dealing with state-of-the-art developments in various nations, or comparative studies of engineering fields will be accepted. The journal explores the dynamics of Research & Development (R&D) under a wide perspective, including not only an emphasis on dissemination of research findings, but also on policy-making and economic growth. The journal also serves as an effective platform for the promotion of scientific exchange between active scientists and engineers.

As far as the criteria for evaluating and accepting submissions are concerned, a rigorous review process has been used. Submitted papers, prior to the formal review, being screened so as to ensure their suitability, Plagiarism and adequacy to the journal. In addition, an initial quality control has been performed, so as to ensure matters such as language, style of references and others, comply with the journal's style.
