Event list:

Sr No.	Event	Designation	Time
1.	Talk Speaker 1: Mr.Chetan Modi Speaker 2: Ms: Kajal Sood	AVP, CREDIT SUISSE Digital Product Manager, ICICI	2pm-4pm
2.	Panel discussion		4pm-5pm

Engineers with their skills in problem solving and multitasking could be better managers if their skills are effectively channelized and if they are given proper training. To help the students in this journey towards management we had organised a talk on 'Engineers in Management'.

The event was conducted on 4th October and there was a crowd of 105 students.

The talk showcased two different perspectives of getting into management one through IIM and one without IIM.

In this session the speakers shared their experience with the students which was very inspiring for the students. After which there was a panel discussion conducted, where the students were able to clear all their doubts and queries. An activity was also conducted in which the students were divided into various groups depending upon their future goals and were made to make a representation of the same.

This event helped the students realise their qualities and the various skills set required for the management job.

The feedback was overall affirmative & fruitful input and they have got an idea on the way to approach to prepare for an MBA degree in future. The summary of the feedback is given below:
