

Colosseum: Stock Market Simulation

Objective:

- To make students aware of the stock market arena through virtual trading.
- To help them analyze and understand the financial and market trends.
- To make them understand various concepts of the stock market world and how it affects the economy.

Outcome:

- Students will be able to learn how to create a portfolio according to the market conditions.
- They will be able to learn and manage virtual money through trading virtually.
- Students' analytical ability will also increase when they study the market and its factors.
- They will also learn a company's fundamentals while buying its stock.

Date : 24th March 2022

Description:

It's a competition where participants invest virtual money using an online application that simulates the stock market as it is. Here students trade stocks with the sole objective of maximizing their profits under market-index. All the participants will be assigned with play money of Rs 10,00,000 in their portfolio and the one with maximum cash in their portfolio wins.

Winners:

1st: Nesline Dsilva

2nd: Laukik Dhumal

3rd: Hitesh Badgujar
