Report on “ STOCK MARKET SIMULATION”

Objective:

- To make students aware of the stock market arena through virtual trading.
- To help them analyze and understand the financial and market trends.
- To make them understand various concepts of the stock market world and how it affects the economy.

Outcome:

- Students will be able to learn how to create a portfolio according to the market conditions.
- They will be able to learn and manage virtual money through trading virtually.
- Student’s analytical ability will also increase when they study the market and factors affecting it.
- They will also learn the fundamentals of a company while buying its stock.

Date and Time: 1st March to 31st March 2021

Number of Registrations: 107

Website of the Application: <https://www.dsj.in/login?returnurl=%2fstock-market-challenge>

Description:

It’s a competition where participants invest virtual money using an online application that simulates the stock market as it is. Here students trade stocks with the sole objective of maximizing their profits under market-index. All the participants will be assigned with play money of Rs 10,00,000 in their portfolio and the one with having maximum money in their portfolio wins.

● **Challenges Faced :**

- Bringing in students for getting registration.
- Technical glitches on the stock market application.

● **Key factor of success of the event:**

- Uniqueness of the subject and event.
- Recent financial news related to stock market.

● **Individual learning in organizing the event:**

- Team management skills while organizing the event.
- Learned how to distribute workload.
- Improved communication skills as we got to interact with many students.
